

Phase matching options are as follows...

-1 (<1ps of another) guarantees the delivered lot contains cables each of which can find at least one other cable in the lot that has a similar delay within 1ps, however the lot itself may range any size, but typically < +/- 2ps range

-2L (Lot +/-2ps) guarantees all cables in the delivered lot are within < +/- 2ps range.

-1L (Lot +/-1ps) guarantees all cables in the delivered lot are within < +/- 1ps range.

NOTE: Matching applies to the entire quantity (lot) of all cables of the same part number, delivered on the same order.
